The **Export CSV** button will download a list of all future run details in a comma-separated values format (or a subset of the runs if a filter is in use)

A combination of any of the filters can be selected. Pressing **Apply Filters** (or Enter while in a box will reduce the list of runs below). A grey **Clear Filters** button will appear if a filter is active.

Selecting the Run number will open the [Run Details](#) page with information for that run pre-populated

Selecting the **Pub Name** will pop up a window with a map and three buttons (**View on OpenStreetMap**, **View on Google Maps**, and **Get Directions**).

Selecting **View GPX** will be available if there is a trail map for the run. It will bring up a screen showing the trail (the **green** dot is the start, the **red** dot is the end, and the **blue** pin is the pub). Selecting the **blue** pin will pop up the name of the pub in a bubble. In the upper right corner is the distance and elevation gained and at the bottom is an elevation profile. Strava, Garmin, Suunto, Polar, Coros, Apple and/or Fitbit icons will appear at the top if the run was downloaded from or recorded via such device or application.
