The **Export CSV** button will download a list of the statistics as per the filter. The default view is all hashers who have attended 20 hashes and sorted by total runs (in descending order).

To search everyone with **John** in the name or hash handle type **John** in the search bar. Update the Minimum Runs to 0 (or blank out) to return a full list (assuming Max is blank). The **Active** box is for all hashers who have attended 3 or more hashes in the last year.

Selecting the hasher will bring up the [Hasher Run History](#) page with that hasher history details populated.
