

Type Manager

Manage Attendance Types

Code	Type	Icon	Actions
0	Walk		  
1	Run		  
2	Hare		  
4	Pram		  
5	Cycle		  
9	Bar Fly		  

Add New Type

Code Type name 

Allows editors to add new **Attendance Types**, **Pub Types**, and **Pub Statuses**.

The Attendance Type view is on the left.

Icons can be updated in **two ways**:

1. Copy & paste from an emoji website such as getemoji.com or emojipedia.org. Find an emoji you like, **Copy the emoji character itself** (not the name or code), and Paste it into the **Icon** field and save

2. Use the built-in emoji picker

Click in the Face **Icon** field to open the picker.

Note: The picker loads a large list of emojis, so it may take a few seconds to appear the first time.

Tip: Simple emojis work best (e.g.      )

Updating the emoji list

The function below allows administrators to upload a new version of the emoji list used by the icon picker.

Where to get the emoji file

Download the official Emojibase raw emoji dataset:

- **Emojibase – data.raw.json**

<https://github.com/milesj/emojibase/tree/master/packages/data/en>

How to prepare the file

1. Download `data.raw.json` from the link above
2. Ensure the file is `Emojibase data.raw.json` and contains "emoji" and "label" fields
3. Do **not** rename the file — it will be renamed automatically when uploaded

What happens when you upload

- The JSON file is validated for compatibility
- The number of usable emojis is counted
- The existing emoji file is backed up automatically
- The new file replaces it immediately if valid

If the file is invalid, it will **not** replace the existing emoji list.

Upload Emoji Data
